

## PAPERS

### Aerodynamics

- 139 Investigation of Passive Flow Control on the Bluff Body with Moving-Belt Experiment**  
Joo-Hyun Rho, Dongho Lee and Kyuhong Kim
- 149 Flow Field Analysis on the Stagnation Streamline of a Blunt Body**  
Chang-Ho Lee
- 157 Prediction of Aerodynamic Loads for NREL Phase VI Wind Turbine Blade in Yawed Condition**  
Ki-Wahn Ryu, Seung-Hee Kang, Yun-Ho Seo and Wook-Ryun Lee

### Structures & Materials

- 167 Development of Flapping Type Wind Turbine System for 5 kW Class Hybrid Power Generation System**  
Haseung Lee, Changduk Kong and Hyunbum Park
- 175 Quantitative Assessment of Variation in Poroelastic Properties of Composite Materials Using Micromechanical RVE Models**  
Su Yeon Han, Sung Jun Kim and Eui Sup Shin

### Structural Dynamics & Aeroelasticity

- 184 Time-Varying Modal Parameters Identification of Large Flexible Spacecraft using a Recursive Algorithm**  
Zhiyu Ni, Zhigang Wu and Shunan Wu

### Guidance and Control

- 195 H Infinity Control Design for Eight-Rotor MAV Attitude System based on Identification by Interval Type II fuzzy neural network**  
Xiangjian CHEN, Kun SHU and Di LIB
- 204 Differential Game Based Air Combat Maneuver Generation Using Scoring Function Matrix**  
Hyunju Park, Byung-Yoon Lee, Min-Jea Tahk and Dong-Wan Yoo
- 214 An Adaptive Complementary Filter For Gyroscope/Vision Integrated Attitude Estimation**  
Chan Gook Park, Chang Ho Kang, Sanghyun Hwang and Chul Joo Chung

### Navigation & Avionics

- 222 An Efficient Attitude Reference System Design Using Velocity Differential Vectors under Weak Acceleration Dynamics**  
Byungjin Lee, Sukchang Yun, Hyung-Keun Lee, Young Jae Lee and Sangkyung Sung
- 232 FPGA based HW/SW Co-Design for Vision based Real-Time Position Measurement of an UAV**  
Young Sik Kim, Jeong Ho Kim, Dong In Han, Mi Hyun Lee, Ji Hoon Park and Dae Woo Lee

### Space Systems

- 240 On-Board Orbit Propagator and Orbit Data Compression for Lunar Explorer using B-spline**  
Junghyun Lee, Sujin Choi and Kwanghee Ko
- 253 Interference Analysis for Synthetic Aperture Radar Calibration Sites with Triangular Trihedral Corner Reflectors**  
Jae-Min Shin and Sung-Woong Ra

### Aircraft & UAV Systems

- 260 A Study on Blended Inlet Body Design for a High Supersonic Unmanned Aerial Vehicle**  
Lianxing You, Xiongqing Yu and Hongmei Li
- 268 Aircraft Derivative Design Optimization Considering Global Sensitivity and Uncertainty of Analysis Models**  
Hyeong-Uk Park, Joon Chung and Jae-Woo Lee
